Project Objectives

- Meet current structural and functional standards to provide 75 to 90 years of service life.
- Retain the hydraulic efficiency of the stream crossing to the extent reasonable.
- Eliminate any noted deficiencies by improving pavement and adjacent drainage.

Project Description

Replacement of the structurally deficient existing dual cell culvert structure with a new precast concrete 3-sided structure with concrete headwalls and wingwalls. Ancillary work will involve approximately 309' of approach roadway reconstruction/rehabilitation, installation of medium stone fill aprons, and guiderailing replacement.
